

Careers Curriculum: KS1					
KS1:	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1&2
	This is Me	Enterprise	World of Work	World of Work	Transport and Travel
What We Will Learn	This unit of work pupils will discover all about themselves, their likes, dislikes and their interests, they will be able to link their interests to job opportunities.	This unit of work pupils will build on prior knowledge about team work and how to cost and produce a Christmas product that they can make and sell to their peers, family and friends and hopefully make a profit from.	Pupils will learn all about a range of job opportunities that is available to them from around their local area, UK and around the world.	Pupils will build on prior learning about a range of different job opportunities and the skills that are required to be able to do a certain type of job. They will learn about fairness, time management and who to go to if they have a problem.	This unit will build on prior learning about transport and the part it plays in work and life. It is all about how to use the correct mode of transport for different distances of work or leisure.
What We Will Do	Pupils will be able to discuss their interests and link their interests to skills that they have identified for future job prospects. They will discuss the benefits of having certain skills that a job may require.	Pupils will discuss the importance of money and finance. They will work as part of a team and share their ideas to plan a Christmas project. They will produce an item to sell and work as part of a team and look at costing the project. They will have to agree and vote on the best product to make for their Christmas sale taking into consideration profit margin.	Pupils will discuss the different job opportunities from all over the UK and around the world. They will identify key skills required for different job roles. Pupils will be able to discuss a range of businesses from small self-employed people to multinational company's e.g. MacDonald's/Greggs. They will look at the basic running and staffing structure.	Pupils will talk about skills they might need in the future. They will discuss their rights and fairness in both life and the work place. They will look at time management and being responsible for themselves.	Pupils will discuss the different modes of transport available to them. They will be able to say a how they would reach a destination using the correct mode of transport. They will understand the role of technology within travel and transport and the part it plays.
Skills Learned	Pupils will be able to identify their own emotions and be able to discuss their feelings and communicate their future needs.	Pupils will be able to transfer their skills of problem solving into a real life setting and produce a product as part of an enterprise project.	Pupils will be able to identify key aspects in their own lives and transfer these skills over into different situations.	Pupils will be able to identify key skills such as respect, fairness and turn-taking to be able to become a team player. They will be able to discuss conflict and provide a resolution.	Pupils will be able to identify key modes of transport. They will be able to identify and link travel and technology.
